

Given: \overline{OM} bisects $\angle LMN$

$$\overline{LM} \cong \overline{NM}$$

Prove: $\triangle MOL \cong \triangle MON$

Given: \overline{JL} bisects \overline{HC}
 $\overline{JH} \parallel \overline{CL}$

Prove: $\triangle JHB \cong \triangle LCB$

Given: $\triangle MGR$ is isosceles with vertex $\angle MGR$
K is the midpt. of \overline{MR}

Prove: $\triangle MGK \cong \triangle RGK$

Given: $\angle 1 \cong \angle 2$; $\overline{RL} \cong \overline{DC}$

Prove: $\overline{RD} \cong \overline{LC}$

Given: $\overline{BC} \parallel \overline{DE}$; $\overline{AB} \parallel \overline{DC}$; \overline{DC} bisects \overline{AE}
Prove: $\overline{BC} \cong \overline{DE}$
