

BONE TISSUE AND STRUCTURE REVIEW

Across

1. Decrease in bone mass
4. Bone tissue with organized appearance
5. Small bone pieces in spongy bone
8. Bone is this type of tissue
10. Head of a long bone
11. Produced in red bone marrow
14. Tiny chambers found within compact bone
16. Tubular units of compact bone
17. Mineral stored in bone
18. Fibrous tissue connecting bone to bone
19. Stored fat inside a long bone
20. Hyaline cartilage that coats a joint

Down

1. Bone absorbing cells
2. Bone tissue with unorganized appearance
3. Shaft of a long bone
4. Tiny channels connecting one lacuna to another
5. Fibrous tissue connecting muscle to bone
6. Tissue covering the outside of a living bone
7. Refers to the formation of bone
9. Bone-forming cells
12. Mineral filled area in bone
13. Fills spaces in living spongy bone
15. Where blood vessels are located in compact bone
16. Found inside a living bone lacuna
17. Connective tissue weaker than bone
