REVISED Summer Reading 2009 6th in to 7th

Students:

I was hoping not to assign homework for you this summer, but you have all agreed that you would rather have my help with the writing in class, than do all the reading in class and do the writing on your own. I believe that by assigning 12-20 pages a night, you will benefit in the end by working on the writing in class. This means, however, that you DO NEED to read every night (except before the weekends). I will be doing reading checks and those that have not completed the reading will spend class time reading while we are working on the assignment. This means that you will have to do the assignment on your own at home.
