

HYPOTHESIS

I think thatbecause

(give reason based on background & educated guess)

MATERIALS

List everything you use & any special location or equipment required ... remember to include safety equipment

PROCEDURE

be as SPECIFIC as possible and list every step

it should be a REPEATABLE experiment based on this information

TITLE

should capture the idea of the experiment
- can be decoratively placed -

STATEMENT OF PROBLEM

this should identify your INDEPENDENT variable & be in the form of a question

RESEARCH / BACKGROUND

1 PARAGRAPH SUMMARY of your background information that is on the back of the mini-board

DATA AND OBSERVATIONS

What you saw in your experiment

can be graphs, pictures, drawings & / or charts

consider using a foldable to share more information

CONCLUSION

My hypothesis that wasbecause

(give reason based on experiment)

RECOMMENDATIONS

explain what you would do next time and why it would make the experiment better

This is a suggestion of what your mini-board COULD look like. Be creative and place the parts of the experiment where you feel they best represent what you are working on. Use pictures, drawings, etc... to fill-in any spaces or maybe draw a nice border around the edges. Remember that neatness counts and sometimes less is more.
