## Human Body Study Sheet #1

- cells are the building block for your body
- cells of the same type make a tissue
- tissues of the same type make an organ
- organs work together to create systems of your body
- your body makes new cells all of the time

### **skin**

- protects you by keeping germs out of your body
- helps your body a steady temperature
- you lose dead skin cells everyday

### **skeleton**

- gives your body shape
- protect your body organs
- adults have about 206 bones
- skull protects your brain
