GREEK ETYMOLOGY PROJECT 3: KETCHUP

Directions

It is one of the most used condiments in the USA. It is quintessentially American, which is to say, it came from somewhere else. You get to research the word **ketchup** and display your findings. But here's the best part: you will do it all online, using [Google Maps](#). Following the history of the word ketchup, you will mark out spots on a map and describe how this word came to us today.

Due Date: 12 May 2010

Rubrics

- I am going to look at your final product for the following items
 - ✓ How many placemarks have you used?
 - ✓ How much information have you included as a part of each placemark (e.g., do you give an extensive quotation from the text, include pictures, embed a video, or do you simply include a sentence or two about what happened)?
 - ✓ Did you properly cite your sources?
 - ✓ Are your placemarks and information correct?

- Depending on the grade you want, determine the level of work you are prepared to do:

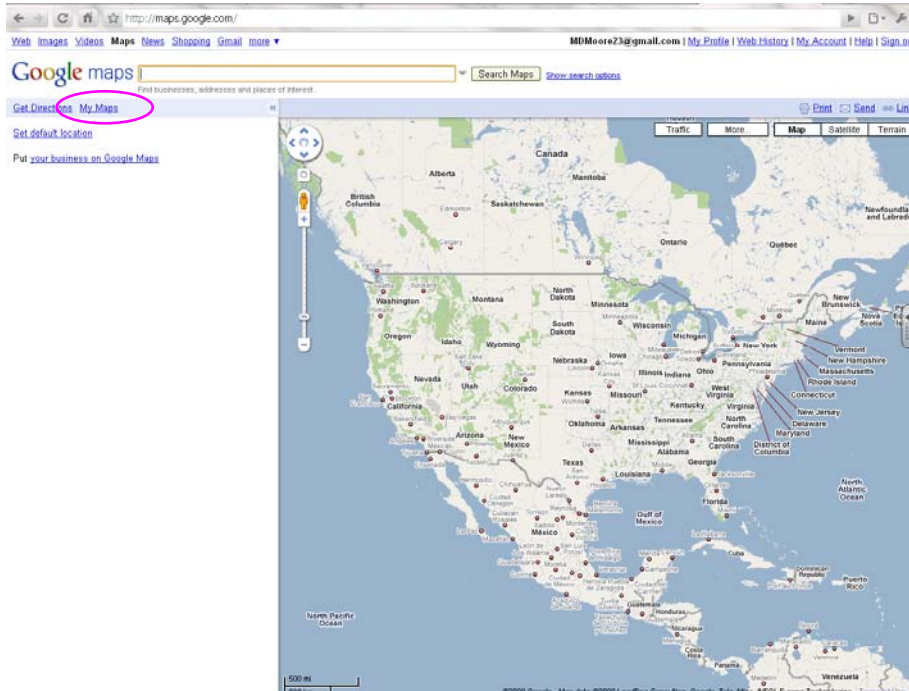

Grade	What I expect
A	Placemarks for every separate place in which ketchup as a word is found; extensive information, embedded video or pictures in each placemark; fewer than 3 errors.
B	Placemarks for every separate place in which ketchup as a word is found; extensive information, embedded video or pictures in most placemarks; fewer than 5 errors.
C	Placemarks for most separate place in which ketchup as a word is found; adequate information, embedded video or pictures in most placemarks; fewer than 7 errors.

✂JMJ✂

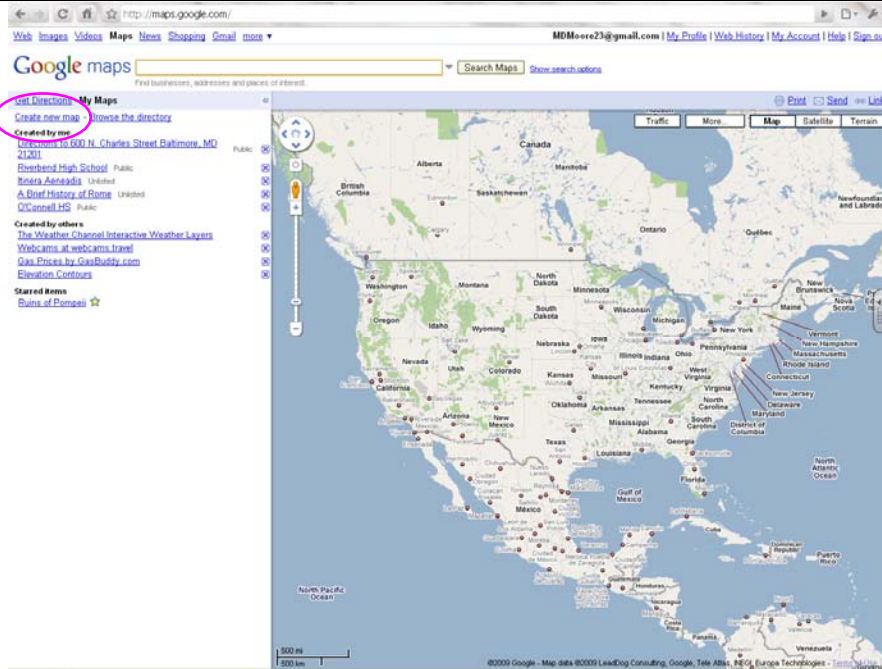

D	Placemarks for most separate place in which ketchup as a word is found; information in most placemarks; fewer than 10 errors.
F	Don't waste your time or mine.

The Project

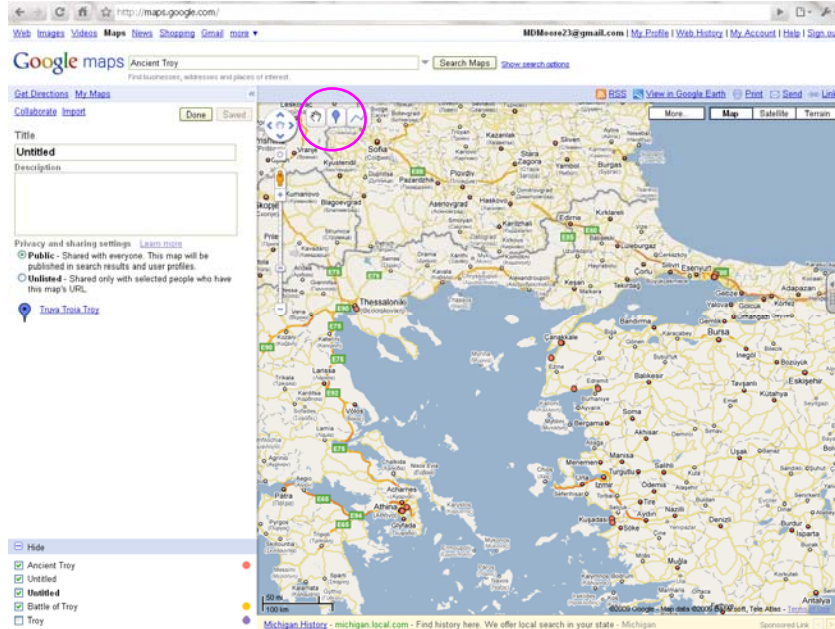

- You should research the history of the word **ketchup** and develop a chronology;
- Open up Google and sign in, using the gmail address that you have already created;
- Go to Google Maps;
- Click on "My Maps"

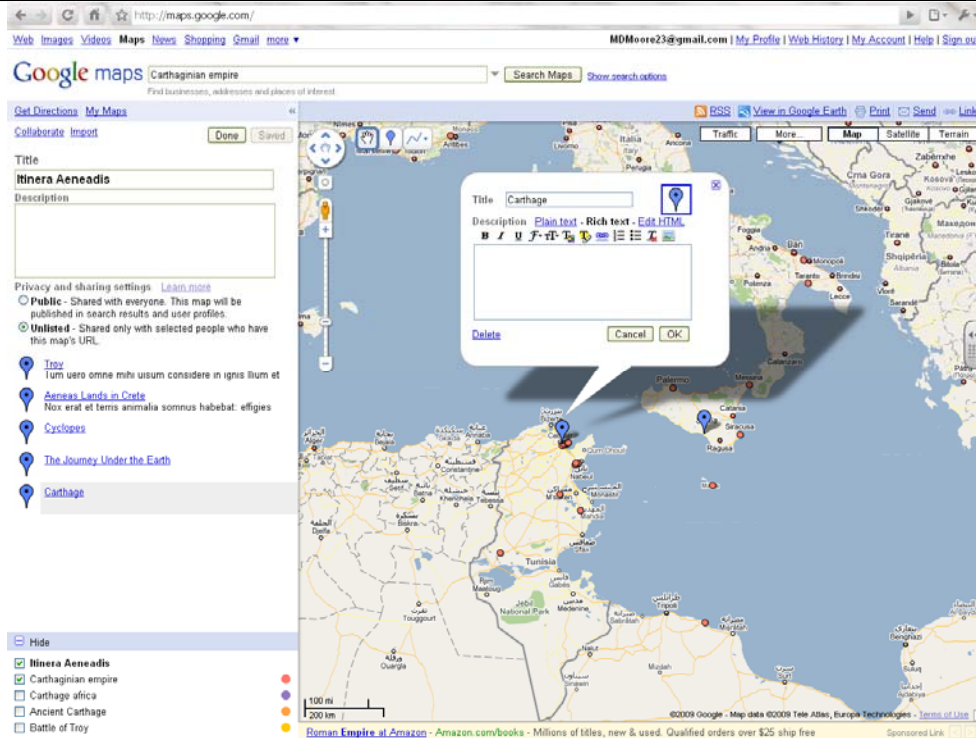

- Click "Create new map"

- Title your map “YourLastName – Ketchup”;
- As you search each location, you will then put down a placemark:

- Once you have set your placemark, give it a name, and enter in the information in the edit setting:

- If you wish to add photos, add links, or embed a video, you should employ the proper [HTML code](#).
- When you have finished, click “Collaborate”, and enter mdmoore23@gmail.com.
