**BELIEVE, ACHIEVE, SUCCEED: The St. Lawrence Advantage**

### Make an Investment in your Children's Future

At St. Lawrence Elementary and Middle Schools, we offer an outstanding academic program coupled with our whole school technology initiative that will encourage your children to reach their potential. Classes in physical education, Spanish, music and art are offered in addition to the academic program, ensuring your child will be nurtured in an environment that encourages excellence in a well-rounded education.

An extended care program is available for students before and after school. During the after-school time, a staffed homework center and piano lessons are available, clubs meet and athletic teams practice and play.

St. Lawrence Elementary School was established in 1961 by the founding pastor, Rev. Victor Wilkiemeyer. In addition to the growing Pre-K program, the St. Lawrence Education Center is comprised of the elementary school, the departmentalized middle school, and the high school, St. Lawrence Academy.

To learn how your children will benefit from the St. Lawrence Advantage, we invite you to attend our Open House and tour the school while meeting our staff, parents and students.
