

iMovie Project

due October 27, 2008

You will create an original iMovie, using the video we took introducing all the members of the ACT class. Each student has the same video footage, but will personalize his/her iMovie by rearranging the video clips, using transitions and titles, and inserting audio and video special effects, sound effects, and voiceovers.

These are the special features required:

- * Title, introduction of the video**
- * A video clip of each student**
- * Transitions between clips**
- * Audio effects**
- * Special Video effects**
- * Rolling Credits at the end**

Enjoy creating your iMovie and personalizing it with your special touches. Hope to see lots of funny effects!
