•	•
•	•

2. Problem: Is Oobleck a solid or a liquid?

3. Observations:

-
-
-
-

4. Conclusion: Is Oobleck a solid or a liquid? Support your answer with information you gathered during your experiments.

37 Conclusion:

4. Is Oobleck a solid or a liquid? Support your answer with information you gathered during your experiments.

Draw pictures!!

Example:

4. Conclusion:

A rock is most like a solid.

My evidence consists of the following observations:

- When we poked it with our finger it did not change its shape, and solids do not change their shape.
- A solid cannot be compressed, and when we squeezed the rock it did not compress.
- Etc....

Name _____

Date _____ Period _____

Oobleck Paragraph:

Oobleck is most like a _____ (solid or liquid). My evidence consists of the following observations:
