

## Wind

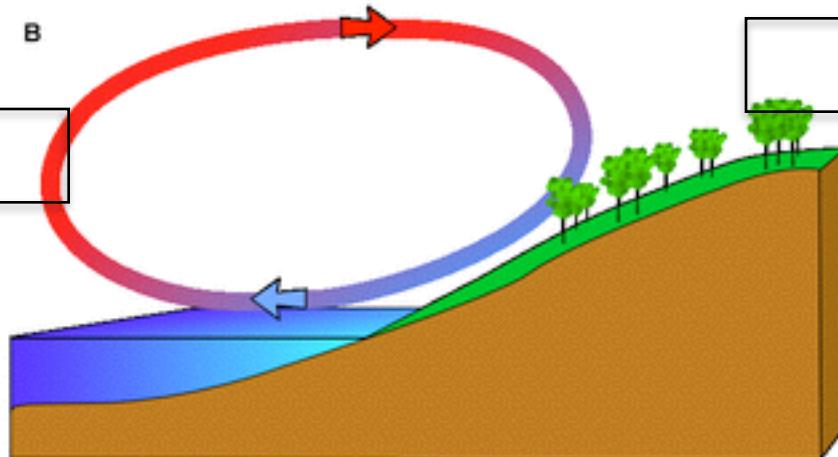

**Directions:** Fill out each box with the correct term, also add drawings of images to your notes as you complete the worksheet.

### Land & Sea Breeze (local wind)

Types of Breeze

Type of Breeze

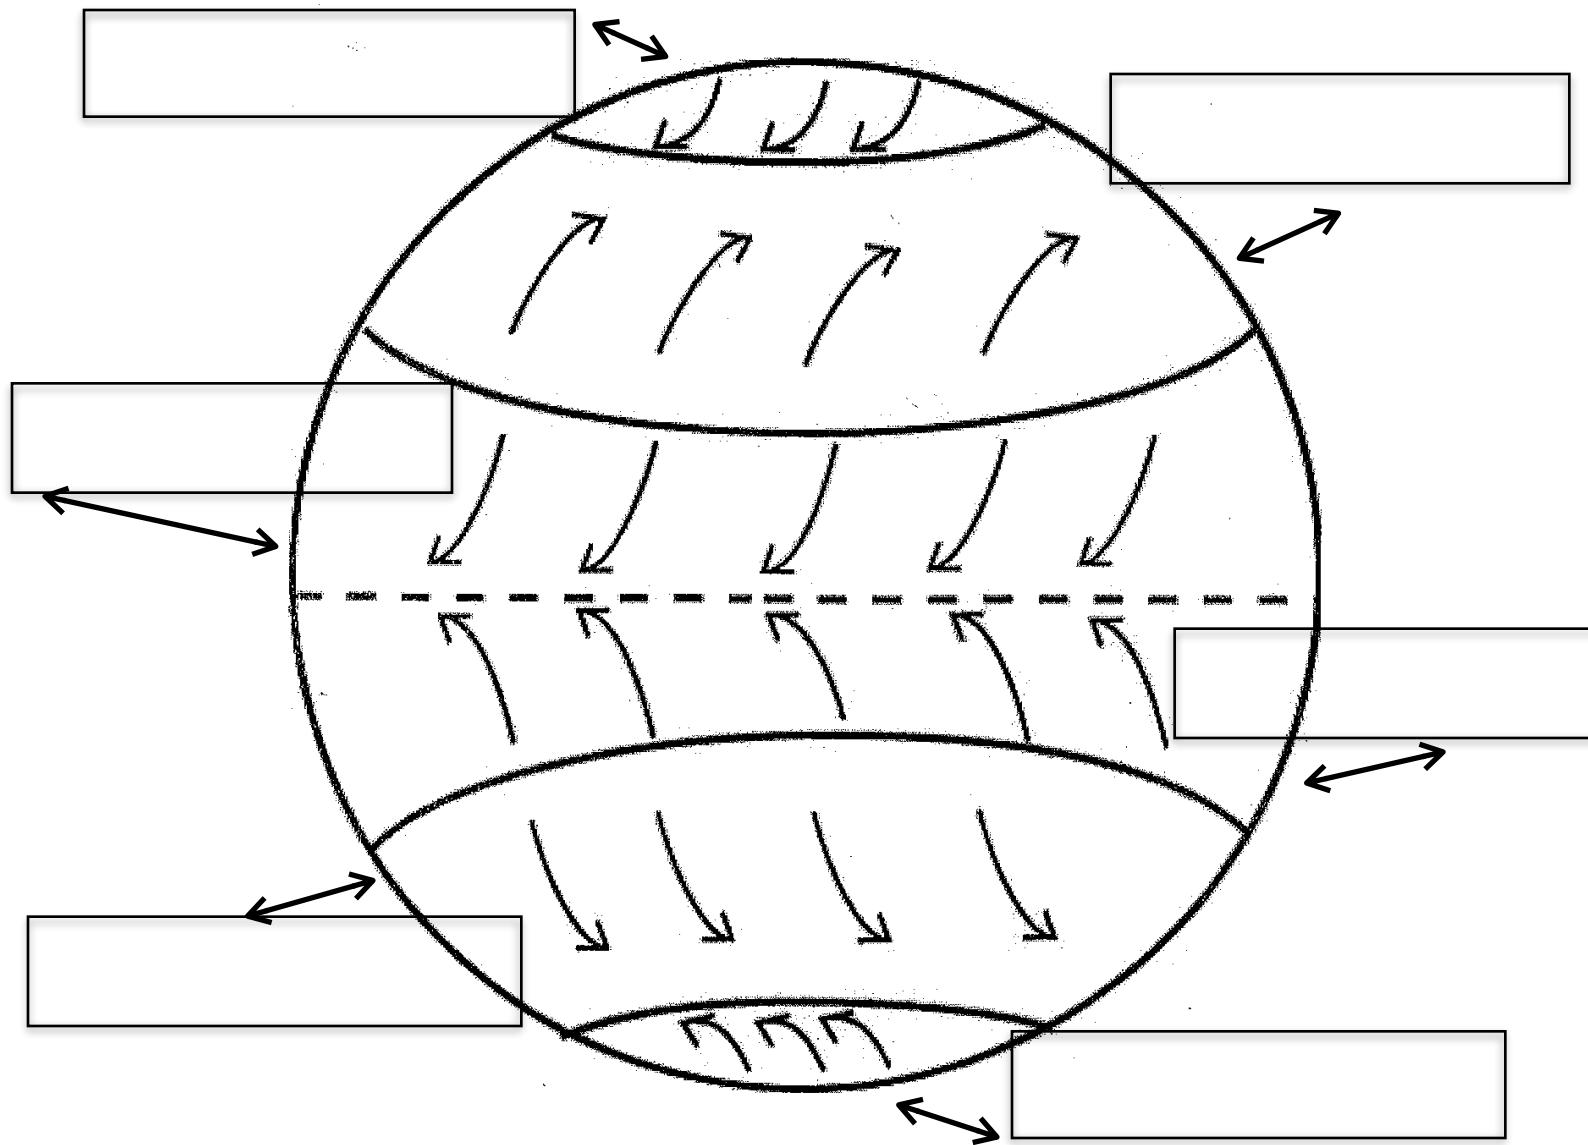

Why is the land warmer during the day

How does this explains why a lake can be calm in the morning but choppy (wavy) in the afternoon?

**Global winds**

Fill in the blanks with the correct type of Global Wind. Also label the correct latitudes for the globe. Draw an example of the warm and cold air convection current.

What is the Jet Stream?

What does the Coriolis Effect do to global winds on Earth
