

# Dictionary and Scanning Race

How fast are you at finding information you need?  
Faster than your neighbour? Well, let's see.

You need a dictionary, a pen and a piece of paper.  
Follow the instructions below carefully.

## STEP ONE

Open the dictionary at any page.

## STEP TWO

Write down the page number in the margin of your paper.

## STEP THREE

Close your eyes and jab your finger on the page.

## STEP FOUR

See what word you have chosen. Write down its definition - NOT the word itself.

## STEP FIVE

Close the dictionary.

Repeat the above until you have twenty definitions on your paper or until your teacher tells you to stop.

## STEP SIX

Now, swap your piece of paper with your neighbour (if you have different dictionaries you will need to swap dictionaries too).

## STEP SEVEN

See who finds all the words first.

## STEP EIGHT

Now write as short a story as possible which uses all your words.
