Preparing to Read

The Lowest Animal
by Mark Twain

**LITERARY SKILLS FOCUS: SATIRE: THE WEAPON OF LAUGHTER**

Satire makes fun of the weaknesses of people or institutions in order to bring about change. Many writers of satire, called satirists, use exaggeration—overstating something to make it look silly. They may also use irony—stating the opposite of what is really meant. As you read Twain’s satire “The Lowest Animal,” look for examples of exaggeration and irony.

**READING SKILLS FOCUS: RECOGNIZING A WRITER’S PURPOSE**

A writer’s purpose is the reason he or she writes something. A writer’s purpose may be to describe, to inform, to narrate, to entertain, to analyze, or to persuade. Satirists use humorous exaggerations and irony to influence people to reexamine their ideas and values, or to develop new attitudes and perspectives.

**Use the Skill** As you read, use the chart below to list examples of exaggeration and irony in “The Lowest Animal.” In the second column, explain what you think Twain’s purpose is for each example.

<table>

Regionalism and Local Color
The Lowest Animal

**SELECTION VOCABULARY**

**dispositions** (DIHS PUH ZHISH UHNS) *n. pl.:* natural ways of acting or thinking.

*We noticed that the teachers had pleasant dispositions as they cheerfully delivered the lesson to the class.*

**verified** (VEHR UH FYD) *v.:* proved something to be true.

*The science experiment verified their theory.*

**caliber** (KAL UH BUHR) *n.:* quality or ability.

*Their perfect test scores showed a high caliber of skill.*

**wantonly** (WAHN TUNH LEE) *adv.:* carelessly, often with ill will.

*Driving wantonly is dangerous and could lead to a crash.*

**transition** (TRAN ZIHSH UHN) *n.:* passage from one condition, form, or stage to another.

*Her transition from high school to college was very easy.*

**avaricious** (AV UH RIHSH UHS) *adj.:* greedy.

*The thief's avaricious desire for money led to his arrest.*

**atrocious** (UH TROH SHUHS) *adj.:* very evil, savage, or brutal.

*The citizens hated the atrocious dictator.*

**WORD STUDY**

**DIRECTIONS:** Write “Yes” if the vocabulary word is being used correctly in each sentence below. Write “No” if it is being used incorrectly, and rewrite the sentence so that the word is used correctly.

1. Because of her *avaricious* nature, she gave much of her income to different charities. _______

   ____________________________________________________________________________

2. The witness *verified* that the masked man was the person who robbed the store. _______

   ____________________________________________________________________________

3. My car’s *transition* wasn’t working properly, so I took it to the mechanic. _______

   ____________________________________________________________________________

4. He *wantonly* threw the candy wrapper on the sidewalk in front of a sign that read “No littering.” _______

   ____________________________________________________________________________
The Lowest Animal
by Mark Twain

BACKGROUND
The works of Mark Twain (1835–1910) are marked by a relaxed, humorous manner of observation. In the following essay, Twain satirizes human nature by describing some experiments he supposedly conducted at the London Zoological Gardens. Twain takes Charles Darwin’s theory that humans evolved from earlier ancestors, or “lower animals,” and turns it upside down.

Man is the Reasoning Animal. Such is the claim.
I have been studying the traits and dispositions of the “lower animals” (so-called) and contrasting them with the traits and dispositions of man. I find the result humiliating to me.
For it obliges me to renounce 1 my allegiance to the Darwinian theory of the Ascent of Man from the Lower Animals, since it now seems plain to me that that theory ought to be vacated in favor of a new and truer one, this new and truer one to be named the Descent of Man from the Higher Animals. 2

In proceeding toward this unpleasant conclusion, I have not guessed or speculated or conjectured, but have used what is commonly called the scientific method. 3 That is to say, I have subjected every postulate 3 that presented itself to the crucial test of actual experiment and have adopted it or rejected it according to the result. Thus, I verified and established each step of my

1. renounce: give up; reject.
2. scientific method: research method in which a theory is tested by careful, documented experiments.
3. postulate (PAHS CHUH LIHT): assumption.

“Man is the Reasoning Animal.”

Word Study
Descent is a noun, related to the verb descend, which means “come down.” Descent is the opposite of ascent, which means “upward movement; rise.” Explain what you think Twain means by “the Descent of Man from the Higher Animals.”

The Lowest Animal

course in its turn before advancing to the next. These experiments were made in the London Zoological Gardens and covered many months of painstaking and fatiguing work.

Before particularizing any of the experiments, I wish to state one or two things which seem to more properly belong in this place than further along. This in the interest of clearness. The massed experiments established to my satisfaction certain generalizations, to wit:

1. That the human race is of one distinct species. It exhibits slight variations—in color, stature, mental caliber, and so on—due to climate, environment, and so forth; but it is a species by itself and not to be confounded with any other.

2. That the quadrupeds\(^4\) are a distinct family, also. This family exhibits variations—in color, size, food preferences, and so on; but it is a family by itself.

3. That the other families—the birds, the fishes, the insects, the reptiles, etc.—are more or less distinct, also. They are in the procession. They are links in the chain which stretches down from the higher animals to man at the bottom.

Some of my experiments were quite curious. In the course of my reading, I had come across a case where, many years ago,

---

4. **quadrupeds**: four-footed animals.
some hunters on our Great Plains organized a buffalo hunt
for the entertainment of an English earl—that, and to provide
some fresh meat for his larder. They had charming sport. They
killed seventy-two of those great animals and ate part of one of
them and left the seventy-one to rot. In order to determine the
difference between an anaconda and an earl—if any—I caused
seven young calves to be turned into the anaconda's cage. The
grateful reptile immediately crushed one of them and swallowed
it, then lay back satisfied. It showed no further interest in the
calves and no disposition to harm them. I tried this experiment
with other ancondas, always with the same result. The fact
stood proven that the difference between an earl and an anaconda
is that the earl is cruel and the anaconda isn't; and that the earl
wantonly destroys what he has no use for, but the anaconda
doesn't. This seemed to suggest that the anaconda was not
descended from the earl. It also seemed to suggest that the earl
was descended from the anaconda, and had lost a good deal in
the transition. D

I was aware that many men who have accumulated more
millions of money than they can ever use have shown a rabid
hunger for more, and have not scrupled to cheat the ignorant
and the helpless out of their poor servings in order to partially
appease that appetite. I furnished a hundred different kinds of
wild and tame animals the opportunity to accumulate vast stores
of food, but none of them would do it. The squirrels and bees
and certain birds made accumulations, but stopped when they
had gathered a winter's supply and could not be persuaded to
add to it either honestly or by chicane. In order to bolster up a
tottering reputation, the ant pretended to store up supplies, but
I was not deceived. I know the ant. These experiments convinced
me that there is this difference between man and the higher
animals: He is avaricious and miserly, they are not. E F

5. larder: supply of food or place where food supplies are kept.
6. anaconda: long, heavy snake that crushes its prey.
7. scrupled: hesitated because of feelings of guilt.
8. appease: satisfy; pacify.
9. chicane (SHIH KAYN): clever deception; trickery.
In the course of my experiments, I convinced myself that among the animals man is the only one that harbors insults and injuries, broods over them, waits till a chance offers, then takes revenge. The passion of revenge is unknown to the higher animals.

Roosters keep harems, but it is by consent of their concubines; therefore no wrong is done. Men keep harems, but it is by brute force, privileged by atrocious laws which the other sex was allowed no hand in making. In this matter man occupies a far lower place than the rooster.

Cats are loose in their morals, but not consciously so. Man, in his descent from the cat, has brought the cat's looseness with him but has left the unconsciousness behind—the saving grace which excuses the cat. The cat is innocent, man is not.

Indecency, vulgarity, obscenity—these are strictly confined to man; he invented them. Among the higher animals there is no trace of them. They hide nothing; they are not ashamed. Man, with his soiled mind, covers himself. He will not even enter a drawing room with his breast and back naked, so alive are he and his mates to indecent suggestion. Man is the Animal that Laughs. But so does the monkey, as Mr. Darwin pointed out, and so does the Australian bird that is called the laughing jackass. No—Man is the Animal that Blushes. He is the only one that does it—or has occasion to.

At the head of this article we see how “three monks were burnt to death” a few days ago and a prior was “put to death with atrocious cruelty.” Do we inquire into the details? No; or we should find out that the prior was subjected to unprintable mutilations. Man—when he is a North American Indian—gouges out his prisoner's eyes; when he is King John, with a nephew to render untroublesome, he uses a red-hot iron; when he is a

10. harbors: clings to; nourishes.
11. harems: groups of females who mate and live with one male.
12. concubines: secondary wives.
13. King John: king of England from 1199 to 1216, known for seizing the throne from his nephew Arthur.
religious zealot\textsuperscript{14} dealing with heretics\textsuperscript{15} in the Middle Ages, he skins his captive alive and scatters salt on his back; in the first Richard's\textsuperscript{16} time, he shuts up a multitude of Jewish families in a tower and sets fire to it; in Columbus's time he captures a family of Spanish Jews and—but that is not printable; in our day in England, a man is fined ten shillings for beating his mother nearly to death with a chair, and another man is fined forty shillings for having four pheasant eggs in his possession without being able to satisfactorily explain how he got them. Of all the animals, man is the only one that is cruel. He is the only one that inflicts pain for the pleasure of doing it. It is a trait that is not known to the higher animals. The cat plays with the frightened mouse; but she has this excuse, that she does not know that the mouse is suffering. The cat is moderate—unhumanly moderate: She only scares the mouse, she does not hurt it; she doesn't

\textbf{C READING FOCUS}

A shilling is a unit of money that is or was once used in some countries, such as Great Britain. What do you think is Twain’s purpose for telling the story about the fines that two different men received?

\textbf{14. zealot (ZEHL UHT): overly enthusiastic person; fanatic.}

\textbf{15. heretics (HEHR UH THIKS): people whose beliefs oppose the major beliefs of their religion.}

\textbf{16. first Richard's: refers to Richard I (1157–1199), also called Richard the Lion-Hearted, king of England from 1189 to 1199.}
dig out its eyes, or tear off its skin, or drive splinters under its nails—man fashion; when she is done playing with it, she makes a sudden meal of it and puts it out of its trouble. Man is the Cruel Animal. He is alone in that distinction. A

The higher animals engage in individual fights, but never in organized masses. Man is the only animal that deals in that atrocity of atrocities, war. He is the only one that gathers his brethren about him and goes forth in cold blood and with calm pulse to exterminate his kind. He is the only animal that for sordid wages will march out, as the Hessians did in our Revolution, and as the boyish Prince Napoleon did in the Zulu war, and help to slaughter strangers of his own species who have done him no harm and with whom he has no quarrel.

Man is the only animal that robs his helpless fellow of his country—takes possession of it and drives him out of it or destroys him. Man has done this in all the ages. There is not an acre of ground on the globe that is in possession of its rightful owner, or that has not been taken away from owner after owner, cycle after cycle, by force and bloodshed. B

Man is the only Slave. And he is the only animal who enslaves. He has always been a slave in one form or another, and has always held other slaves in bondage under him in one way or another. In our day he is always some man's slave for wages and does that man's work; and this slave has other slaves under him for minor wages, and they do his work. The higher animals are the only ones who exclusively do their own work and provide their own living. C

Man is the only Patriot. He sets himself apart in his own country, under his own flag, and sneers at the other nations, and keeps multitudinous uniformed assassins on hand at heavy expense to grab slices of other people's countries and keep them from grabbing slices of his. And in the intervals between

---

17. Hessians (HEHSH UHNZ): German soldiers who served for pay in the British army during the American Revolution.
18. Prince Napoleon . . . Zulu war: In search of adventure, Prince Napoleon, son of Napoleon III, joined the British campaign against Zululand (part of South Africa) in 1879.
campaigns, he washes the blood off his hands and works for “the universal brotherhood of man”—with his mouth.

Man is the Religious Animal. He is the only Religious Animal. He is the only animal that has the True Religion—several of them. He is the only animal that loves his neighbor as himself, and cuts his throat if his theology isn’t straight. He has made a graveyard of the globe in trying his honest best to smooth his brother’s path to happiness and heaven. He was at it in the time of the Caesars, he was at it in Mahomet’s\textsuperscript{19} time, he was at it in the time of the Inquisition, he was at it in France a couple of centuries, he was at it in England in Mary’s day,\textsuperscript{20} he has been at it ever since he first saw the light, he is at it today in Crete—he will be at it somewhere else tomorrow. The higher animals have no religion. And we are told that they are going to be left out, in the hereafter. I wonder why. It seems questionable taste. \(\text{D}\)

Man is the Reasoning Animal. Such is the claim. I think it is open to dispute. Indeed, my experiments have proven to me that he is the Unreasoning Animal. Note his history, as sketched above. It seems plain to me that whatever he is, he is \textit{not} a reasoning animal. His record is the fantastic record of a maniac. I consider that the strongest count against his intelligence is the fact that with that record back of him, he blandly sets himself up as the head animal of the lot; whereas by his own standards, he is the bottom one.

In truth, man is incurably foolish. Simple things which the other animals easily learn he is incapable of learning. Among my experiments was this. In an hour I taught a cat and a dog to be friends. I put them in a cage. In another hour I taught them to be friends with a rabbit. In the course of two days I was able to add a fox, a goose, a squirrel, and some doves. Finally a monkey. They lived together in peace, even affectionately. \(\text{E}\)

\textbf{LITERARY FOCUS D}\n
Underline an example of \\textit{irony} in this paragraph. Why is this ironic?

\textbf{LITERARY FOCUS E}\n
Is the information in this paragraph an example of \\textit{exaggeration}? Why or why not?

\textit{Mahomet’s:} Muhammad (c. 570–632) was an Arab prophet with whom Islam originated.

\textit{in Mary’s day:} during the reign of Queen Mary (1553–1558), who was given the nickname “Bloody Mary” because she ordered the deaths of many Protestants.
Next, in another cage I confined an Irish Catholic from Tipperary, and as soon as he seemed tame, I added a Scottish Presbyterian from Aberdeen. Next a Turk from Constantinople, a Greek Christian from Crete, an Armenian, a Methodist from the wilds of Arkansas, a Buddhist from China, a Brahman from Benares. Finally, a Salvation Army colonel from Wapping. Then I stayed away two whole days. When I came back to note results, the cage of Higher Animals was all right, but in the other there was but a chaos of gory odds and ends of turbans and fezzes and plaids and bones and flesh—not a specimen left alive. These Reasoning Animals had disagreed on a theological detail and carried the matter to a higher court.
**Use an Exaggeration Table**

**Directions:** In the table below, list three examples of exaggeration from “The Lowest Animal.” Then, explain what makes each one an example of exaggeration.
