Organelle Analogies WS

The Cell is like a _____

(Ex: City, school, football team, etc.; make sure you can make a link for all the organelles listed)

For each cell organelle:

1. Write the *function* of the organelle (what does it do in the cell?) Example: The nucleus is the control center of a cell.
2. What "*person/item*" is the organelle like in your *analogy*? Example: The nucleus is like the Mayor in the City.
3. What is the *LINK*? (Why are they similar?) Example: The Mayor and the nucleus both act as control centers.

Nucleus

Function: _____

Analogy: _____

Link: _____

Cell membrane

Function: _____

Analogy: _____

Link: _____

Chloroplast

Function: _____

Analogy: _____

Link: _____

Cytoplasm

Function: _____

Analogy: _____

Link: _____

Endoplasmic reticulum

Function: _____

Analogy: _____

Link: _____

Mitochondria

Function: _____

Analogy: _____

Link: _____

Golgi apparatus

Function: _____

Analogy: _____

Link: _____

Ribosome

Function: _____

Analogy: _____

Link: _____

Vacuole

Function: _____

Analogy: _____

Link: _____
