

Investigation 2.2 Forces Summary

Do AFTER investigation is complete on loose-leaf! **All rules of ENGLISH apply!**

1. Include both data tables
2. Paragraph summarizing what difference the surface made in the speed of the ball and what you think caused there to be a difference. Was your hypothesis supported or unsupported by your data?
3. A force diagram of each surface indicating net force. Watch the size of your arrows!
(See #7 & Figure 2.4 in the Investigation)
