

## **Post. 2-10 Protractor Post.**

---

$\angle$ 's are measured in units called **DEGREES**

**Post. 2.11 The  $\angle$  Addition Post.**

---

If pt. R is in the interior of  $\angle PQS$ ,  
then  $m\angle PQR + m\angle RQS = m\angle PQS$

## **Th. 2-3 Supplement Th.**

---

**If 2  $\angle$ 's form a linear pair, then they are supplementary**

## **Th. 2-4 Complement Th.**

---

**If 2 adj.  $\angle$ 's form rt.  $\angle$ , then they are complementary.**

## **Th. 2-5**

---

**Congruence of  $\angle$ 's is reflexive, symmetric, and transitive**

## **Th. 2-6**

---

**$\angle$ 's supp. to the same  $\angle$  or to  $\cong \angle$ 's are  $\cong$**

## **Th. 2-7**

---

**$\angle$ 's comp. to the same  $\angle$  or to  $\cong \angle$ 's are  $\cong$**

## **Th. 2-8**

---

**Vertical  $\angle$ 's are  $\cong$**

## **Th. 2-9**

---

**$\perp$  lines intersect to form 4 rt.  $\angle$ 's**

## **Th. 2-10**

---

**All right  $\angle$ 's are  $\cong$**

## **Th. 2.11**

---

**$\perp$  lines form  $\cong$  adj.  $\angle$ 's**

## **Th. 2.12**

---

**If 2  $\angle$ 's are  $\cong$  and supp.,  
then each  $\angle$  is a rt.  $\angle$**

## **Th. 2.13**

---

**If  $2 \cong \angle$ 's form a linear pair, then they are rt.  $\angle$ 's**

**Given:**  $\angle 1$  and  $\angle 2$  are adj.  $\angle$ 's,  $\angle 1 \cong \angle 3$

**Prove:**  $\angle 2$  and  $\angle 3$  are supp.  $\angle$ 's

| Statements   | Reasons |
|--|---------|
| ① $\angle 1$ & $\angle 2$ are adj $\angle$ 's<br>$\angle 1 \cong \angle 3$ | ① Given |

**Given:**  $\overrightarrow{EA} \perp \overrightarrow{EC}$ ;  $\overrightarrow{EB} \perp \overrightarrow{ED}$

**Prove:**  $\angle 1 \cong \angle 3$
