

**Graph each function. Use a separate piece of graph paper.**

1.  $y = -\cos(3x) - 2$

2.  $y = \frac{1}{2}\sec(2x) - 1$

3.  $y = 3\sin x + 3$

4.  $y = -2\csc(x/2)$

5.  $y = \tan(4x)$

6.  $y = \cot(x/3) + 1$
