

## Presentations on 21<sup>st</sup> Century Issues

You will be working in groups to produce a presentation on a modern day issue (for example: Games and Learning, social Media and Privacy, Students and Stress). You can do a different topic but check with me first, please!

Add any **media** you choose to enhance your work (music, video, animation etc).

You will also make a **short survey** to collect information and **design a poster** (on the same topic), which shows the most interesting information you have found. I will explain more about the survey in Week 3.

We only have 4 weeks to complete it so a lot of work needs to be done outside class.

Come every week to the workshop so that you can continue to share ideas etc. with your group and also because we take attendance on Thursdays!

You also need to have an **online group** or way of sharing information so that you can share your ideas before you come to class. You can decide what that online group is.
